

SM 800 - Series 800 W DC POWER SUPPLY

Models	Voltage range	Current range
SM 7.5-80	0 - 7.5 V	0 - 80 A
SM 18-50	0 - 18 V	0 - 50 A
SM 70-AR-24 Autoranging output	0 - 35 V 0 - 70 V	0 - 24 A 0 - 12 A
SM 400-AR-4 Autoranging output	0 - 200 V 0 - 400 V	0 - 4 A 0 - 2 A

Features

- Designed for long life at full power
- Excellent dynamic response to load changes
- Protected against all overload and short circuit conditions
- EMC surpasses CE requirements: low emission & high immunity
- Low audible noise: fans are temperature controlled
- Available options: High Speed Programming, Interfaces, Extra Isolation, Sequencer, Digital Encoders, Power Sink etc.

Functionalities

- Master/Slave parallel and series operation with voltage and current sharing
- Stacking is allowed, space between units is not required
- High power system configuration from multiple units
- 19" rack mounting or for laboratory use (feet included)
- Remote sensing
- Interlock

Mounting	Stacking of units allowed, air flow is from rear to the sides.
Input Connector	IEC320/C14, EN 60320/C14
Output Terminals	M5 bolts
Programming connector	15 pole D-connector at rear panel (FEMALE)
Cooling audio noise level airflow	Low noise blower, fan speed adapts to temperature of internal heatsink. ca. 45 dBA at full load, 25 °C ambient temperature, 1 m distance ca. 50 dBA at full load, 50 °C ambient temperature, 1 m distance from rear to sides
Enclosure degree of protection	IP20
Dimensions behind front panel: h x w x d front panel: h x w	86 x 221 x 406 mm (feet removed) 88.1 x 222 mm (1/2 19", 2 U)
Weight	5.4 kg

Typical Applications

- Accurate current sources
- Electronic circuit development
- Component device testing
- ATE in industrial production lines
- Automotive battery simulation
- Controlled battery (dis)charging
- Lasers
- Driving PWM-controlled DC-motors
- Medical research equipment
- Aerospace and military equipment

Available Options

Increased Output Power

The conservatively rated unit allows to deliver extra output with the same reliability.

At some derating, either the maximum output voltage or the maximum output current can be increased by about 10%.

- Order Code - P069

High speed programming

A 10 to 20 times higher programming speed (down to 0.2 ms rise time at full load)

and lower output capacitance. Excellent for laser applications, test systems or as current source with low parallel capacitance as used in plasma chambers.

- Order Codes :
SM 7.5-80 P250 - SM 70-AR-24 P252
SM 18-50 P251 - SM 400-AR-4 P253

Two-Quadrant Output: Power sink

Two quadrant operations maintains the output voltage constant regardless the

output power is positive or negative. Ideal for PWM-speed controlled DC-motors and ATE systems.

- Order Codes :
SM 7.5-80 P245 - SM 70-AR-24 P247
SM 18-50 P246 - SM 400-AR-4 P248

Digital Voltage and current setting

Reliable, long life digital encoders are implemented at the front panel.

Includes total front panel lock (also for CV/CC-knobs) and a coarse or fine pitch adjustment depending on the turning speed.

- Order Code - P236

High Voltage Isolation

A higher output isolation allows series operation up to 1000V

- Order Code - P089

Secured Voltage and Current Setting

For a maximum security, the CV/CC settings can be adjusted with a screwdriver only and are protected with a plastic cap from accidental adjusting.

- Order Code - P001

Sequencer

Arbitrary Waveform generator or standalone automation.

The sequencer is integrated in the Ethernet controller.

- Order Code - P256

Front Power Output

Blind posts at the front panel instead of at the rear panel.

- Order Codes :
SM 7.5-80 n.a. - SM 70-AR-24 P258
SM 18-50 P257 - SM 400-AR-4 P259

19" Rack Mounting Adapter

The 19" mounting adapters makes it possible to position one or two units side by side in a 19" rack.

- Order Code RA19 - 2SM800

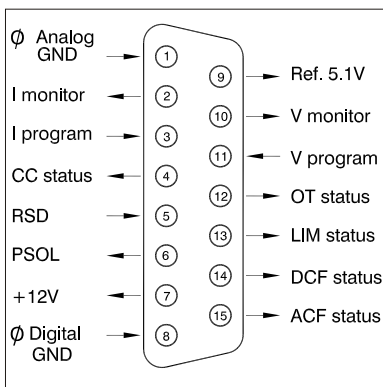

Software control and interfaces

Factory installed programming interfaces:

- ISO AMP Card - isolated analog - P249
- RS232 controller - P254
- IEEE488 controller - P255
- Ethernet controller (incl. sequencer) - P256
- PROFIBUS controller - P271
- CANBUS controller - P272

Note: 1. Download special datasheet about High Speed Program., Power Sink and Battery Charging from www.powersolve.co.uk
2. There is only room for one of the interfaces in a unit (P249, P254, P255, P256, P271 or P272).

Connections programming connector

CV = Constant Voltage
 CC = Constant Current

Specifications measured at $t_{amb} = 25 \pm 5^\circ C$ and $V_{in} = 230 V AC$, 50 Hz, unless otherwise noted.
