Dimensions:

DTE20:

3.78 x 2.13 x 0.92" (96.0 x 54.0 x 23.3 mm)

Available in two wide (4:1) input ranges for nominal 24VDC and 48VDC, the DTE20 series of encapsulated 20W DC-DC converters are chassis mount as standard or can be ordered with a DIN rail mount. They have screw terminals for ease of connection and an LED provides clear 'power good' indication. Remote On/Off is standard and when inhibited the standby current is just 3mA. Isolation is 2.5kVDC input/output providing excellent separation between supply and load. The modules are fully protected against input undervoltage, short circuit and overload conditions. These features, along with a rugged design and wide operating temperature range make the DTE20 series suitable for a variety of commercial and industrial applications.

Notes

1. Input current measured at nominal input voltage.
2. Typical values.
3. For optional version fitted with Din Clip add suffix '-D' e.g. DTE2024S24-D.
4. Input current is typically 3 mA at nominal input voltage when output is remotely turned off.
